

What Chews are Safe for Dog's Teeth?

Good Chews That Are Flexible and Help to Reduce Tartar Build Up:

Tartar Shield Chews
VeggieDent Chews
Kong Toys
Compressed Rawhide, Rawhide Chips/Strips
Rubber Balls
Healthy Edibles and Gumma Bone Nylabones
Jolly Balls
Greenies
Dentabones

Bad Chews That Are Too Hard and Can Fracture Teeth:

Knuckle Bones
Cooked or Cured/Smoked Bones
Antler
Hard Nylabones
Hooves
Pig Ears
Tennis Balls
Rawhide with knots
Bully Sticks
Tendon/Ligament Rawhides

Prolonged chewing on tennis balls may cause extreme wear. Please always supervise your dog while chewing on any new toy or treat to be sure they don't swallow large chunks that can cause choking or become an obstructive foreign body.
